

BARB COMPOSITE BULLS

Building a quality composite starts with a reliable base of breeds...

Vista's BARB Composite combines the very best of Vista's Braunvieh and Red Angus breeding programs with select Brahman AI sires to create a more tropical version of the Adaptor Hybrid.

Vista's **BARB** Composite is:

3/8 Braunvieh X 3/8 Red Angus X 1/4 Brahman

BARB Composite bulls are ideal for building replacement females with unmatched maternal strengths, and desirable carcass qualities, while still well adapted to hotter and more humid production environments.

Lot 401 may be the most complete BARB bull we have raised yet. He is solid red, really clean with both muscle and marbling.

Lot 402 shows a lot of the character of the old Chinook bull when you look past the stripes and big scurrs. He is extra long and the best marbling Barb bull.

Lot 403 is dark brindle. He outperformed the others for growth on test and has a really nice disposition.

Lot 401
